PROFESSIONAL SUMMARY

IT professional with experience in PKI infrastructure, Digital and Electronic Signature, and Argentine government systems. I currently coordinate the Digital Signature Division (SICYT) both technically and administratively, managing national certification authorities, HSM device operations, and Level 3 technical support, in environments where security and traceability are essential.

I also maintain my personal project, SignumID, which enables digital document signing and validation. I am pursuing a degree in Computer Science and am looking to keep growing in IT toward software development roles (backend and/or frontend), combining my systems experience with new challenges.

PROFESSIONAL EXPERIENCE

Digital Signature Coordinator

Secretariat of Innovation, Science and Technology of the Nation · 2025 – Present · Buenos Aires, Argentina

I lead the implementation and evolution of Digital Signature platforms in Argentina, primarily coordinating the technical team as well as administrative and operational staff. I had the privilege of leading the full migration of 4 cryptographic HSM units and their configuration to ensure service continuity. I regularly take part in exchange forums with Latin American countries and other international organizations, sharing technical expertise to improve digital signature implementation across our countries. I promote the adoption of digital signature in the public and private sectors and support digital transformation initiatives, facilitating the adoption and evolution of technology solutions within the National Government.

- Technical and operational leadership of a team of 15+ people.
- Primary technical point of contact for operations, Level 3 support, and continuity of the PKI infrastructure.
- Management and follow-up of digital certification projects and integration implementations.
- Administrator of the ONTI Certification Authority (AC ONTI).
- Use and knowledge of National Government platforms (GDE and TAD).
- Preparation of technical management reports and responses for internal and external audits.

Certification Authority Administrator and Level 3 Support

Secretariat of Innovation, Science and Technology of the Nation · 2022 – 2025 · Buenos Aires, Argentina

I took charge of administering a National Certification Authority (AC ONTI), keeping it operational, producing reports, and providing Level 3 technical support. Primary point of reference for hardware-based digital signature inquiries.

- Administration, support, and maintenance of AC ONTI.
- Maintenance of Windows Server infrastructure and operation of Hardware Security Modules (HSM).
- Design and execution of complex SQL Server queries for operational report automation.
- Resolution of 1,000+ annual advanced Level 3 support incidents.
- Design, implementation, and maintenance of the Trust Service List (TSL) of Argentina.
- Reference consulting for other countries implementing their own trust lists.
- Definition of technical requirements and functional testing for the Signature Validator (validadordefirmas.gob.ar), used by 2+ million people.
- Digital Signature training for Registration Authorities nationwide.

Registration Officer and Technical Assistant

Secretariat of Innovation, Science and Technology of the Nation · 2021 – 2022 · Buenos Aires, Argentina

- Management of digital certificate requests.
- Technical and procedural assistance to subscribers and Registration Authorities.
- Level 1 technical support, resolving 200+ incidents annually.

Customer Service

Various companies · 2016 – 2021 · Chascomús / La Plata, Argentina

- Customer service, order management, and cash handling.

PERSONAL PROJECTS

SignumID (www.signumid.com.ar)

Recently launched project combining my knowledge of digital and electronic signatures with my skills as a developer, built to make electronic document signing and validation accessible and easy to understand for everyone — 100% free and secure.

CUIT Generator

Web app for generating syntactically valid test data. Stack: HTML, CSS, JavaScript.

github.com/Federicolseas/CUITGenerator

Invoicing Bot

Integration with AFIP (Argentina's tax authority) for issuing electronic invoices via Telegram, with client management. Stack: Node.js, AFIP SDK.

github.com/Federicolseas/FacturadorFIDEV-Prod

Team Manager

Application for internal staff management, office attendance, leave, and equipment. Stack: Node.js, Supabase.

github.com/Federicolseas/GestionAPP-DEMO

TECHNICAL SKILLS

Infrastructure & Security: PKI · Digital Signature · HSM · Windows Server · TLS · X.509 Certificates

Databases: SQL Server

Development: JavaScript · Node.js · HTML · CSS · Git · Spec Driven Development (SDD) · REST APIs

Management: JIRA Service Desk · GDE · TAD · Technical Documentation · Team Leadership

EDUCATION

2026 – En curso

Universidad Siglo 21

Licenciatura en Informática

2018 – 2025

Universidad Nacional de La Plata

Nota: Abandonada por incompatibilidad horaria

Licenciatura en informática

Certifications

- Luna Network HSM 7 Certification Course (2025) — Complus SA, official Thales partner
- Artificial Intelligence: tools to boost our work (2025) — Aioxnis

LANGUAGES

Spanish: Native · English: Advanced technical reading comprehension — basic speaking
