PROFESSIONAL SUMMARY

Fullstack developer in training, with a solid foundation in critical security systems and PKI infrastructure. Currently exploring agentic AI development as part of my workflow. Pursuing a **Bachelor's Degree in Computer Science** and looking to make the formal transition into a fullstack development role, with a focus on building secure and reliable software.

PROFESSIONAL EXPERIENCE

Digital Signature Coordinator

[Secretariat of Innovation, Science and Technology of the Nation](#) · 2025 – Present · Buenos Aires, Argentina

Leading the implementation and evolution of Digital Signature platforms in Argentina, coordinating technical, administrative, and operational teams.

- Technical and operational leadership of a team of +15 people.
- Led the full migration of 4 cryptographic HSM devices, ensuring service continuity.
- Main technical point of reference for operations, L3 support, and PKI infrastructure continuity.
- Management and follow-up of digital certification projects and integration implementations.
- Regular participation in technical exchange forums with Latin American countries and international organizations, promoting the adoption of digital signatures in the public and private sectors.
- Use and knowledge of National Government platforms (GDE and TAD).
- Preparation of technical management reports and responses for internal and external audits.

Certificate Authority Administrator and L3 Support

[Secretariat of Innovation, Science and Technology of the Nation](#) · 2022 – 2025 · Buenos Aires, Argentina

Administration of the AC ONTI Certificate Authority and Level 3 technical support.

- Administration, support, and maintenance of AC ONTI.
- Main point of reference for hardware-based digital signature inquiries.
- Maintenance of Windows Server infrastructure and operation of Hardware Security Modules (HSM).
- Design and execution of complex SQL Server queries for operational report automation.
- Resolution of +1,000 annual advanced Level 3 support incidents.
- Design, implementation, and maintenance of Argentina's TSL (Trusted List).
- Reference consulting for other countries implementing their own trusted lists.
- Definition of technical requirements and functional testing for the Signature Validator (validadordefirmas.gob.ar).
- Digital Signature training for Registration Authorities nationwide.

Registration Officer and Technical Assistant

[Secretariat of Innovation, Science and Technology of the Nation](#) · 2021 – 2022 · Buenos Aires, Argentina

- Management of digital certificate requests.
- Technical and procedural assistance to subscribers and Registration Authorities.
- Level 1 technical support, resolving +200 incidents annually.

Freelance Development Assistant

Independent collaboration · 2019 · La Plata, Argentina

- Development of specific features (buttons, interactive functions) for third-party websites, using HTML, CSS, and JavaScript.
- First practical hands-on experience in web development, collaborating with an external developer.

Customer Service Representative

Various companies · 2016 – 2021 · Chascomús / La Plata, Argentina

- Customer service, order management, and cash handling.

PERSONAL PROJECTS

SignumID (www.signumid.com.ar)

Personal project combining my professional PKI experience with fullstack development: a platform for signing and validating electronic documents, supporting multiple standards (PAdES, CAdES, XAdES), trust chain verification against multiple countries' TLSs, revocation checking (OCSP/CRL), and timestamping.

Stack: React, Node.js/Express, Go (local agent for USB token signing), SQLite.

Soccer Tactics Planner

Interactive web application for soccer coaching staff: roster management, vector-based (SVG) tactical boards with drag & drop and touch support, and printable PDF match sheets.

Stack: React, Vite, CSS.

github.com/Federicolseas/Planificador-tactica-futbol

Invoicing Bot

Telegram bot for issuing electronic invoices (AFIP/ARCA), including CAE retrieval, frequent client management, and legal PDF generation. Built with a conversational state machine architecture and hybrid webhook/polling mode.

Stack: Node.js, Express, MongoDB, AFIP SDK.

github.com/Federicolseas/Facturador-ARCA-DEMO

CUIT Generator

Web app for generating syntactically valid test CUIL/CUIT numbers.

Stack: HTML, CSS, JavaScript.

github.com/Federicolseas/CUITGenerator

TECHNICAL SKILLS

Databases: SQL Server · MongoDB · SQLite · Supabase

Development: JavaScript · React · Node.js · Go · REST APIs · Git · Agentic AI development (Antigravity/Gemini, Claude Code, OpenCode, and other tools) · HTML · CSS

Infrastructure & Security: PKI · Cryptographic devices · Windows Server · TLS · X.509 Certificates

Management: JIRA Service Desk · GDE · TAD · Technical documentation · Team leadership

EDUCATION

2026 – In progress	Universidad Siglo 21 Bachelor's Degree in Computer Science
2018 – 2025 Note: Not completed due to schedule conflicts	Universidad Nacional de La Plata Bachelor's Degree in Computer Science

Certifications

- Luna Network HSM 7 Certification Course (2025) — Complus SA, Official Thales Partner
- Artificial Intelligence: Tools to Enhance Our Work (2025) — Aioxnis

LANGUAGES

Spanish: Native · **English:** Advanced technical reading comprehension — basic spoken proficiency
